Route G SAT Textbook	
<p>10. In the poem "A Party of Lovers" by John Keats, the speaker describes a group of people at a party.</p> <p>Which quotation from the poem best supports the claim that the partygoers are disinterested and detached from the festive mood of a party?</p> <p>(A) "Pensive they sit, and roll their languid eyes,/ Nibble their toast, and cool their tea with sighs,"</p> <p>(B) "The fire is going out and no one rings/ For coals, and therefore no coals Betty brings."</p> <p>(C) "A fly is in the milk-pot, must he die/ By a humane society?/ No, no; there Mr. Werter takes his spoon, Inserts it, dips the handle, and lol soon/ The little straggler, sav'd from perils dark,"</p> <p>(D) "Arise! take snuffers by the handle,/ There's a large cauliflower in each candle."</p>	<p>12. Identity theft, a pervasive issue in our digital age, occurs when someone unlawfully acquires and uses another person's personal information for fraudulent purposes. This crime involves various forms, such as financial identity theft, criminal identity theft, each posing unique risks to the victims. According to cybersecurity expert Elena Martinez, identity theft can have severe consequences, including financial loss and damage to one's reputation. _____ emphasize that individuals must be vigilant and adopt proactive measures to safeguard their personal information.</p> <p>Which choice completes the text so that it conforms to the conventions of Standard English?</p> <p>(A) Technologist, Sarah Chang</p> <p>(B) Technologist Sarah Chang,</p> <p>(C) Technologist Sarah Chang</p> <p>(D) Technologist, Sarah Chang,</p>
<p>11. Research in psychology has consistently explored the potential link between exposure to violent media and an uptick in aggressive behavior among individuals. Numerous studies have observed a correlation between the two, sparking debates about the nature of this relationship. However, others argue that there may be other influential factors contributing to aggressive behavior. As such, proponents of the stance that correlation does not imply causation argue that it is unjustifiable to conclude a direct cause-and-effect relationship. They posit that _____.</p> <p>Which choice most logically completes the text?</p> <p>(A) media violence is often a reflection of societal aggression, thus a cause of individual aggressive behavior</p> <p>(B) individuals prone to aggression are more likely to be drawn to violent media content</p> <p>(C) the impact of violent media on behavior doesn't rely on personal experiences and upbringing</p> <p>(D) societal attitudes toward aggression influence the prevalence of violent content in the media</p>	<p>13. Electricians play a crucial role in ensuring safety and functionality of electrical power systems. According to industry experts, a significant reduction in electrical accidents can be achieved when professionals prioritize thorough inspections and preventive maintenance. _____ must be diligent in adhering to safety protocols to minimize the risk of hazards. Additionally, staying current with advancements in electrical technology and participating in ongoing training programs is essential for electricians to continually enhance their skills and knowledge, ensuring they are well-equipped to address evolving challenges in the field.</p> <p>Which choice completes the text so that it conforms to the conventions of Standard English?</p> <p>(A) They</p> <p>(B) Their</p> <p>(C) He</p> <p>(D) It</p>
<p>10. A: Choice A is the best answer because it presents the quotation that most effectively illustrates the claim that the partygoers are disinterested and detached. This quotation describes the partygoers as sitting _____.</p> <p>13</p> <p> Route G</p> <p>Route G SAT Textbook</p> <p>pensive, rolling their languid eyes, and displaying a lack of enthusiasm by nibbling their toast and cooling their tea with sighs. Choice B is incorrect because it does not directly support the claim of disinterest and detachment. Choice C is incorrect because it describes a humorous incident with a fly in the milk-pot, but it does not directly support the claim of disinterest and detachment. Choice D is incorrect because it mentions taking snuffers and a large cauliflower in each candle, but it does not directly support the claim of disinterest and detachment.</p> <p>11. B: Choice B is the best answer because it most logically completes the text's discussion of the argument that the correlation between exposure to violent media and an increase in aggressive behavior doesn't necessarily imply causation. The argument suggests that individuals predisposed to aggression may be more inclined to consume violent media content, creating a correlation without establishing a direct cause-and-effect relationship. Choice A is incorrect because it presents a cause-and-effect relationship. Choice C is incorrect as it supports the opposite opinion. Proponents arguing for a non-direct cause-and-effect relationship may consider personal experiences and upbringing as influential factors. Choice D is incorrect because it discusses societal attitudes influencing media content rather than addressing the causation argument.</p> <p>12. C: Choice C is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed to set off the proper noun "Sarah Chang" from the title that describes Chang, "technologist." Because "Sarah Chang" is essential information identifying the "technologist," no punctuation is necessary. Choice A is incorrect because no punctuation is needed. Choice B is incorrect because no punctuation is needed. Choice D is incorrect because no punctuation is needed before or after the proper noun "Sarah Chang." Setting the technologist's name off with commas suggests that it could be removed without affecting the coherence of the sentence, which isn't the case.</p> <p>13. A: Choice A is the best answer. The convention being tested is pronoun-antecedent agreement. The plural pronoun "They" agrees in number with the plural antecedent "electricians." Choice B is incorrect because the use of "their" creates a possessive pronoun but does not serve as the correct subject for the sentence. Choice C is incorrect because the singular pronoun "he" does not accurately represent the group of professionals, as it may exclude female electricians and does not align with inclusive language. Choice D is incorrect because the singular pronoun "It" doesn't agree in number with the plural antecedent "electricians."</p>
